

FACT SHEET

# Clever Payment Gateway

Easily take over the phone card payments & settle accounts quickly!

# Clever Payment Gateway

## Need to take over the phone card payments? Want an easy way for customers to immediately settle amounts?

Clever Payment Gateway does just that – gives you a gateway for customer payments. It allows you to take card payments over the phone, perfect for call centres and finance departments looking to settle accounts immediately and credit chase. It's a simple and quick way for you to get money in your bank!

### Features

- Works seamlessly with OPayo, Stripe and Barclaycard
- Initiate payments from sales documents, posted invoices as well as ad hoc payments from cash receipt journals to settle an account
- Additionally supports scheduled payments, delayed payments, back- order payments and refunds
- Save customer payment details using token code rather than the card details – completely PCR compliant
- Provides an audit trail
- Easily reconcile between what you expect and what you get (helpful for the dreaded audit trail!) using corresponding cash receipts

### Requirements

Dynamics 365 Business Central or Premium
